## Know where your vehicle is

*Guard-Alert Electronics helps to protect one of your most prized assets by ensuring that you are always aware of where your vehicle is. We are proud to unveil Vehicle Satellite Tracking, yet another product to our customers which ensures that your security and peace of mind is enhanced, especially focusing on your prized possessions. Below are a few facts which will help you to make an informed decision on your decision to install vehicle satellite tracking.*

*Satellite vehicle allows you to:*

- **Know where your vehicle is all the time.** This is done on line and can either be in real time or the recording played back post the event

- **Historical viewing** of the vehicle's location- this can be done by simply punching a date range to find out specific information. It is therefore possible to:

1. View step by step the route taken by the vehicle
2. Monitor vehicle usage
3. Reduce unauthorised vehicle usage

- For those in client services it is possible to **map which clients have been visited** over a period of time by your sales staff

- **Receive live alerts** on the location and "behaviour" of the vehicle and these can be delivered via text on the phone or via email and recipients of the messages can be pre-selected. Monitored events

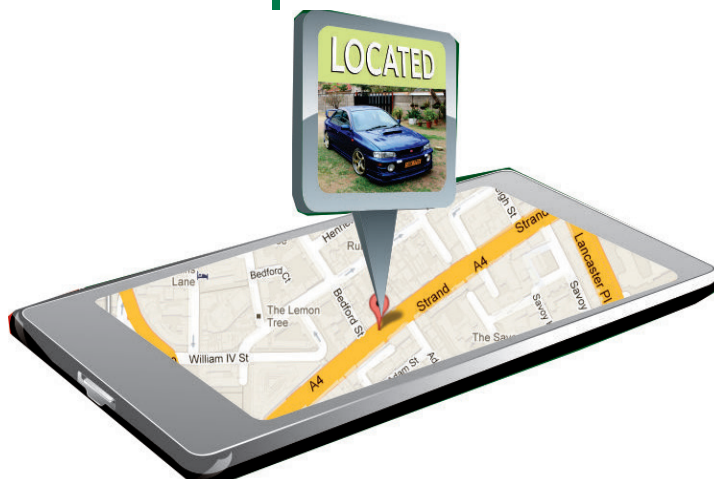

include: car idling, ignition on/off, speeding over a certain set threshold and a panic button to alert the Guard-Alert 24 hour control room to call you in case

of incidences such as car jacking, accidents or for any other required assistance.

- **Geo-fencing-** it is possible to create an imaginary fence of any shape around a specific location. Alerts will be sent to selected phone numbers or emails when the driver of the vehicle goes "out of bounds"

- **Reports and analysis-** the user can access different reports about what is happening with vehicles, such as number of kilometres travelled per month, sites travelled to etc.

- **Generation of tracking numbers** which can be passed on to a third party so that they can also trace the said vehicle though this will be on a limited access basis.

# VEHICLE TRACKING **FREE** INSTALLATION

**\$20**  
rental per month
